Restorative Dental Materials, 11e (Dental Materials: Properties & Manipulation (Craig))

Synopsis

This resource provides thorough, up-to-date coverage of the latest dental materials and backs it with fundamental information needed to correctly use dental materials in the clinic and dental laboratory. A problem-solving approach is emphasized throughout this book, especially when applying new information to practical situations. Additionally, it incorporates case studies throughout to illustrate concepts in the chapters. The scientific basis for technical procedures and manipulation of materials is provided, and at the end of chapters students have the opportunity to work through selected problems and verify their solutions. This edition features major revisions of core concepts such as cements, esthetic materials, and bonding, as well as new chapters on preventive materials and impression materials. Spanish version of 10th edition also available, ISBN: 84-8174-287-2
